‹Khalid TALEB/›

Software Developer

• about me

Looking for an entry-level position in the field of information technology (IT), my goal is to make sure that each project is fit for purpose and that execution is well optimized in in terms of cost and time, and that the job is well done. To share my experience and knowledge with the members of the team and to propose ideas contributing to the development of the project or to the company's project management policy.
